# NFI-ODCE Preliminary Snapshot Report <sup>(A)</sup>

Quarter-ended 09/30/2023

100% of Net Assets Reported

Released 10/13/2023

**Notes:**

(A) The NFI-ODCE (NCREIF Fund Index - Open-End Diversified Core Equity) is a fund-level capitalization weighted, time-weighted return index and includes property investments at ownership share, cash balances and leverage (i.e., returns reflect the fund's actual asset ownership positions and financing strategy).

(B) The NFI-ODCE Index begins as of the first quarter of 1978, inclusive. "NA" indicates that historical data is not available since NFI-ODCE Index inception.

(C) The sum of income and appreciation returns may not equal total return due to rounding and/or the compounding of individual component returns to each other.

(D) Change is not applicable ("NA") if the report is based on less than 100% of active funds reporting.

The NFI-ODCE, like the NPI and other stock and bond indices, is a capitalization-weighted Index based on each funds Net Invested Capital, which is defined as Beginning Market Value Net Assets (BMV), adjusted for Weighted Cash Flows (WCF) during the period. To the extent WCF are not available; which may be the case for older liquidated funds, BMV is used. Indices are typically capitalization-weighted as they better represent the universe and the performance of the overall marketplace. Total Return of any capitalization-weighted Index is therefore more influenced by the larger funds (based on Net Invested Capital) included in the Index. Additional information, such as the equally-weighted NFI-ODCE is also presented to show what the results would be if all funds were treated equally, regardless of size. This presentation is typically used for statistical purposes and peer to peer comparisons.
