Core Real Estate Funds Post the Highest One-Year Return Since Fourth Quarter 2022

CHICAGO, IL, July 30, 2025 – The National Council of Real Estate Investment Fiduciaries (NCREIF) released second quarter 2025 results for the NCREIF Fund Index – Open-end Diversified Core Equity (NFI-ODCE). The NFI-ODCE consists of 25 funds totaling \$278.0 billion of gross real estate assets and \$228.3 billion of net real estate assets.

NFI-ODCE total return gross of fees for second quarter 2025 was 1.03%, down from 1.06% in the previous quarter, and up from -0.45% a year ago in second quarter 2024. The income return was 1.01%, virtually the same as the previous quarter, and slightly down from 1.02% in the second quarter of 2024. The appreciation return was 0.01% for the quarter, below the previous quarter’s 0.05%, and up from 2024 second quarter’s -1.46%. The average quarterly total, income and appreciation returns are 1.97%, 1.64% and 0.33%, respectively, since inception in the first quarter of 1978.

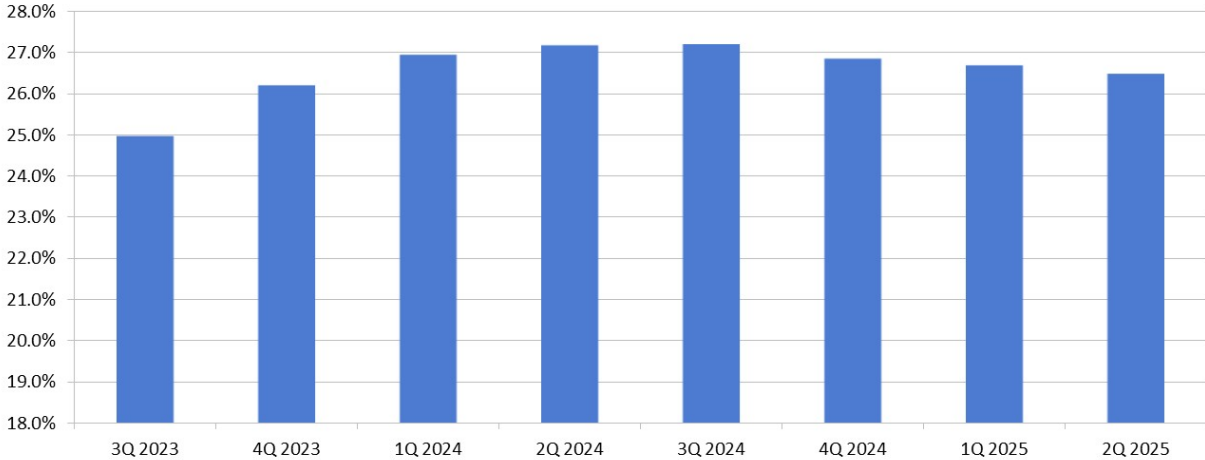

Quarterly NFI-ODCE Gross Total Return Trends

For the year ended June 30, 2025, the NFI-ODCE delivered a gross total return of 3.54%, its strongest performance since 7.47% was posted in the fourth quarter of 2022. The current quarter’s total return was comprised of 4.15% income and -0.59% appreciation.

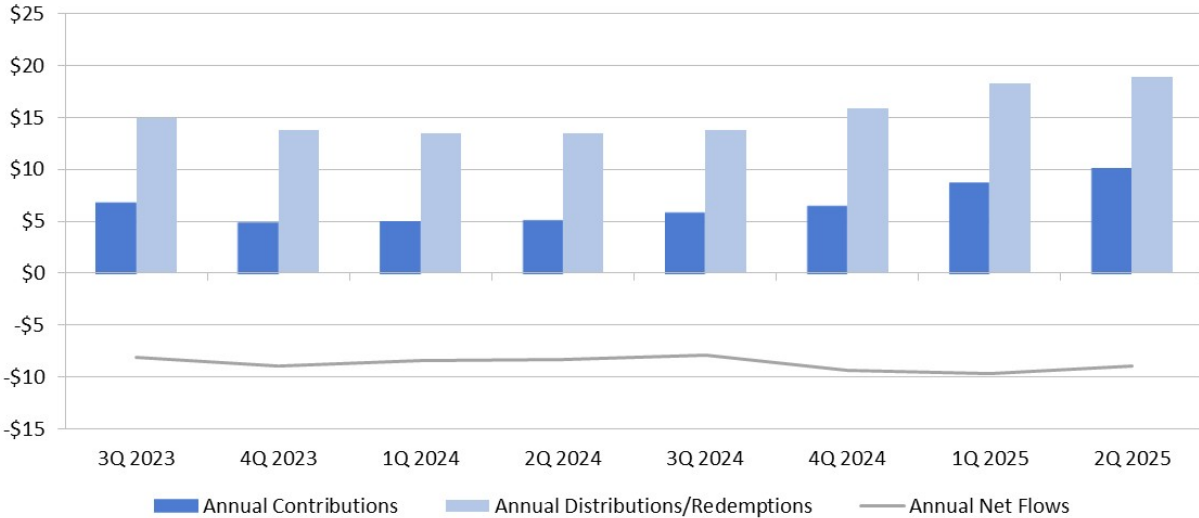

NFI-ODCE returns measure fund-level performance and therefore can reflect leverage and other investments beyond properties, including cash balances. Leverage is conservative among these funds given their core strategies, ranging from 15% to 34% over the quarterly series history beginning in 2000. NFI-ODCE leverage is above the 22.3% average since 2000, registering 26.5% as of the current quarter-end, down slightly from the previous quarter's 26.7%.

NFI-ODCE Leverage Trends (% of total assets)

Quarterly investor net cash flows (investor contributions, less distributions and redemptions) were negative \$1.7 billion, virtually the same as last quarter, and below second quarter 2024's negative \$2.4 billion. Year-over-year, contributions increased 93.8%, an improvement over last quarter's 70.4%. For the year ended June 30, 2025, contributions were \$10.0 billion, and distributions and redemptions were \$19.0 billion, resulting in an annual investor net cash flow of negative \$9.0 billion, compared to last quarter's negative \$9.7 billion.

About the NFI-ODCE Index

The NFI-ODCE Index is a capitalization-weighted, gross of fees, time-weighted return index with an inception date of January 1, 1978. Published reports may also contain equal-weighted and net of fees information. Open-end Funds are generally defined as infinite-life vehicles consisting of multiple investors who have the ability to enter or exit the fund on a periodic basis, subject to contribution and/or redemption requests, thereby providing a degree of potential investment liquidity. The term Diversified Core Equity style typically reflects lower risk investment strategies utilizing low leverage and generally represented by equity ownership positions in stable US operating properties.
